

MIAA Handbook - Rule 54

Student Eligibility: Home Educated Students Clarification

The MIAA Board of Directors affirmed in January of 2011, that home school student access to an MIAA member school athletic program is limited to the traditional comprehensive high school within the district in which the student resides. In multi comprehensive high school districts, the home school student access is limited to the school pre-determined by that school district's protocol or process as adopted by that school committee.
