

#1 Set-up **WRESTLER A**–underhooks **WRESTLER B's** arm...**WRESTLER A**–with opposite arm reaches under the throat of **WRESTLER B**...

#2 **WRESTLER A**–grabs his own arm used to underhook **WRESTLER B's** arm. This creates pressure across the throat and carotid artery. This is also an **ILLEGAL** head lock as there is no arm encircled **ILLEGAL**.

NOTE: Official should move to underhook side and lower his/her level so they can see up under both wrestlers to see arm movement.
